

# HUDSON COUNTY:

## Meadowlands Parkway Bridge

**FUNDING RECOMMENDATION:** \$500,000 for Fiscal Year 2019

**LOCATION:** Town of Secaucus

**ABOUT THE PROJECT:** The Meadowlands Parkway Bridge connects an industrial and commercial area in Secaucus to the New Jersey Turnpike, Frank R. Lautenberg NJ TRANSIT station and State Route 3. This important arterial roadway crosses over a Norfolk Southern rail line.

Built in 1973, the four-lane, four-span bridge has a series of parallel steel beams supporting the deck. The bridge, which is 316 feet long, is classified as structurally deficient and functionally obsolete. The New Jersey Department of Transportation and Town of Secaucus have already undertaken \$3 million in temporary structural repairs to the bridge, including installing additional steel supports.

**PROJECT DESCRIPTION:** The project will investigate options for replacing or rehabilitating the bridge, which is owned by the Town of Secaucus. This project will be led by Hudson County.
