## **Transportation Improvement Program Fiscal Years 2004 - 2006**

Routes: Section: Passaic Street, Mileposts: N/A DBNUM: NS9601

Ward Street to Rochelle Avenue

Passaic Street is a two-lane roadway that crosses Route 17 in Rochelle Park. It is the municipality's major commercial street, connects with heavily congested Route 17, and provides access to the Garden State Plaza Mall. As a result, Passaic Street experiences high traffic volumes and a deteriorating level of service. Westbound traffic is negatively impacted by left-turn movements to and from the Route 17 ramps. During peak periods, the queues from vehicles turning left onto the Route 17 south ramp extend for over 500 feet and impact the Passaic Street/Rochelle Avenue intersection. Possible improvements such as the widening of Passaic Street, traffic signalization, and realignment of the Route 17 off-ramp will be studied.

Routes: 1&9 Section: (28) Secaucus Road Mileposts: 56.80 - 63.00 DBNUM: X207

to Broad Avenue

This project has three major components: (1) Pavement reconstruction, (2) widening/upgrading of the roadway section to current standards, and (3) drainage system improvements. The project also includes new sidewalks on both sides of the roadway, increase in lane widths (11-foot minimum), utility relocations, replacement/upgrading of all traffic signals and curb ramps to comply with ADA requirements. Concrete median barriers, left-turn lanes and shoulder construction is included between 70th and 83rd Streets in North Bergen to accommodate large-scale commercial development. Also included within this project is a new northbound left-turn lane on Tonnelle Avenue (Route 1&9) at 69th Street. This project will be pedestrian compatible; however, bicycles will not be accommodated.

Construction will be multi-year funded under the provisions of Section 13 of P.L. 1995, c.108. The anticipated construction cost is \$29,200,000.

Routes: 1&9 Section: Fiber Optics Mileposts: 47.80 - 62.80 DBNUM: 03306

Communications Infrastructure

This program will provide for the design and construction of the critical fiber optic communications backbone link between the North Traffic Operations Center, Trenton Headquarters Emergency Control Center, the South Traffic Operations Center and the State Police. Construction of this 15-mile segment of fiber optics will complete the connection of appoximately 100 miles of cable and ITS facilities installed, owned, maintained and operated by NJDOT that extends from north to south in the state.

## **Transportation Improvement Program Fiscal Years 2004 - 2006**

Routes: 3 Section: Passaic River Mileposts: DBNUM: 799

Crossing & Service Road Improvements

This project will provide for safety and operational improvements from west of the Route 17 interchange in Lyndhurst to east of the Main Avenue interchange in Clifton. Improvements include the replacement of eight structures (Route 3 over Passaic River, Route 3 over NJ TRANSIT, Route 3 over Lower Pond, Route 3 over River Road, Route 3 over Route 21 ramps, Park Avenue over Route 3, Ridge Road over Route 3, and Orient Way over Route 3), addition of a 12-foot auxiliary lane eastbound and westbound to alleviate the congestion experienced through the corridor during peak periods, specifically at the ramp merge points and the Passaic River Crossing. In addition to the auxiliary lanes, standard acceleration and deceleration lanes will be provided to safely transition vehicles to and from the highway. The existing roadway is a limited-access urban freeway/expressway and does not contain special provisions for bicycle and pedestrian compatibility; the proposed project does not change the existing conditions.

(Structure Nos. 1601156, 1601157, 1601158, 1601159, 1601160, 1601161, 1601162, 1601163, 1601164, 0203151, 0203152, 0203153)

Routes: 17 Section: (3) Essex Street Mileposts: 9.90 - 10.40 DBNUM: 9105

Bridge

The existing deficient structure of four travel lanes will be replaced with a new, wider structure of six travel lanes which is compatible with planned future improvements on Route 17.

This is a multi-year funded project under the provisions of Section 13 of P.L. 1995, c.108. The construction cost is anticipated to be \$31,200,000.

The federal Transportation Equity Act for the 21st Century (TEA-21) provided funding for this project under Section 1601, High Priority Projects Program. The Act allocated \$1.88 M for this project. FY 2000 and FY2001 RABAs have increased the total authorization amount to \$1,924,377. The FY 2002 Federal Appropriations Act provided \$300,000 for this project from the Transportation and Community and System Preservation Program.

## **Transportation Improvement Program Fiscal Years 2004 - 2006**

Routes: 17 Section: Essex Street, Mileposts: 10.00 DBNUM: 93173

Drainage

This drainage improvement will convey stormwater from Route 17 along a closed system from Route 17 to the Saddle River, and will provide for a 15-year storm protection. The drainage pipe will be approximately 11 feet in diameter. The outfall structure will be equipped with an automated stainless steel sluice gate to prevent backwater from entering the system and causing upstream flooding when the Saddle River reaches flood stage. A secondary back-up valve will also be installed. Also, an intake structure will be constructed in the vicinity of Marty's Plaza to receive I-80 stormwater. Due to the nature of the project, it is not designed to be bicycle/pedestrian compatible.

This is a multi-year funded project under the provisions of Section 13 of P. L. 1995, c.108. The total construction cost is \$22,720,000; the remaining needs are shown below.

## **Transportation Improvement Program Fiscal Years 2004 - 2006**

Routes: 17 Section: NYS&W Bridge Mileposts: 10.90 DBNUM: 94057

This proposed bridge rehabilitation or replacement was identified by Bridge Management System. The overall rating of the structure is fair due to the condition of the superstructure and the inadequate deck geometry.

The federal Transportation Equity Act for the 21st Century (TEA-21) provided funding for this project under Section 1601, High Priority Projects Program. The Act allocated \$1.13 M for this project. FY 2000 and FY2001 RABAs have increased the total authorization amount to \$1,154,626.

## **Transportation Improvement Program Fiscal Years 2004 - 2006**

Routes: 46 Section: Main Street, Lodi Mileposts: 66.65 - 66.66 DBNUM: 93281

This project includes safety and drainage improvements that consist of ramp reconfigurations, installation of two traffic signals at new ramp locations, replacement of two bridges, installation of three retaining walls, changes in the roadway profile and installation of two detention basins to eliminate flood conditions along Route 46 and Main Street. The widening along Route 46 and Main Street will accommodate existing turning movements and the addition of acceleration and deceleration lanes. The project does not include any new through travel lanes. This project will be bicycle/pedestrian compatible.

The FY 2002 Federal Appropriations Act provided \$1.0 million of Transportation and Community and Systems Preservation Program funding for this project.
