Transportation Improvement Program Fiscal Years 2022 - 2025

Routes /

Mileposts: 0.3-0.4

DBNUM: N1801

Name: East Anderson Street Bridge (02C0023A) over the Hackensack River

The existing bridge is a twin six-span, simply supported structure with a total length of 302'-2". The total width of the bridge is 74'-0". The bridge was constructed in 1971 and carries four (4) 12-foot lanes between curbs bounded by 5-foot wide sidewalks on both sides. The bridge has a 10' wide medium which contains a 5' wide utility bank between the two structures providing for separate eastbound and westbound roadways. The bridge replaced an existing swing span structure. The superstructure consists of 11 adjacent prestressed concrete box beams overlaid with an asphalt wearing course. There is cracking in the grout joints between the adjacent units resulting in reflective cracks in the wearing surface, eventually causing corrosion of the non-prestressed and prestressed reinforcement.

Routes 4 /

Mileposts: 8.8-9.3

DBNUM: 08410

Name: Route 4, Grand Avenue Bridge

This project will replace the deck structure of structurally deficient bridge built in 1931. The Westbound right through-lane through the intersection will be eliminated. The existing through lane will be used to provide a deceleration lane, an exclusive merge lane, and an acceleration lane that will introduce the right through-lane after the interchange to improve safety at the ramp terminus. A bus shelter will be constructed at the existing bus stop, along with ADA-compliant curb ramps and sidewalks. Gaps in existing sidewalk will be eliminated.

Name: Route 4, Tunbridge Road to Route 9W

First identified by the Pavement Management System (PMS), this project will resurface the roadway within the project limits. This element of the project scope will include ADA upgrades and: curb repairs; guiderail replacement; and resets for utility covers, drainage grates, fire hydrants, manhole, and gas/water covers. Subsequently to the PMS review, the Safety Management System identified the intersection of Route 9 and Kelby Street as needing operational and safety improvements. This element of the project scope will include: new traffic signals with video detection; re-striping of thru and turn lanes; pedestrian push buttons and pedestrian signal heads; high visibility cross walks; ADA compliant curb ramp upgrades and sidewalk upgrades.

Routes 7 /

Mileposts: 1.5 - 3.8

DBNUM: 93186

Name: Route 7, Kearny, Drainage Improvements

This section of Route 7 is generally uncurbed and frequently flooded due to low elevation and lack of sufficient highway drainage system. Roadway runoff is collected through inlets or sheet flow, discharging directly into the marshlands. During moderate and heavy storms, in addition to high tide, the runoff overflows the banks onto the roadway and adjacent properties. This causes the highway to be closed and traffic is detoured. This project will provide highway drainage system improvements including; pumping stations, raising road profile and sheet piling to prevent tidal water to flood the roadway.

DBNUM: 93186

Name: Route 7, Kearny, Drainage Improvements

This section of Route 7 is generally uncurbed and frequently flooded due to low elevation and lack of sufficient highway drainage system. Roadway runoff is collected through inlets or sheet flow, discharging directly into the marshlands. During moderate and heavy storms, in addition to high tide, the runoff overflows the banks onto the roadway and adjacent properties. This causes the highway to be closed and traffic is detoured. This project will provide highway drainage system improvements including; pumping stations, raising road profile and sheet piling to prevent tidal water to flood the roadway.
