Routes: **Section:** Amwell Road Bridge **Mileposts:** N/A **DBNUM:** L002

Amwell Road Bridge over Neshanic River, replacement

This project will replace the existing Amwell Road bridge over the Neshanic River. The bridge is 7.3 meters between abutments with one lane in each direction. The bridge and roadway approaches will be widened to provide two 3.6 meter lanes and 2.4 meter shoulders in each direction. The roadway approaches will also be realigned to provide adequate sight distance. The anticipated roadway improvements include improvements at the intersection. As part of the project, the Amwell Road/Montgomery Road/Black Point Road intersection will be improved. The intersection improvements will consist of milling, resurfacing, new concrete curb construction and drainage.

Amwell Road Railroad Bridge over Conrail, replacement

The project involves replacement of the existing Amwell Road bridge over Conrail Trenton Rail Line (now CSX Rail). The existing single-span bridge is classified as structurally deficient and functionally obsolete. The replacement structure will be located to the south of the existing alignment to meet the future alignment of Amwell Road following construction of the Route 206 Bypass. The bridge will be constructed on an improved vertical alignment, increasing the existing substandard sight distance over the rail line and will provide a 12-foot travel lane and 12-foot shoulder in each direction.
