

Warren County Transportation Plan Project Fact Sheet

Developing the Plan

Warren County, in partnership with the NJTPA, is developing a long-range transportation plan to provide a vision for the future of the County's transportation network through 2045. The plan will identify recommendations and a phased implementation plan to address transportation needs, overcome challenges, and leverage opportunities across a broad range of projects, policies, and strategies.

A crossroads of the region, Warren County is composed of a complex array of urban, suburban, and rural communities that are frequently changing in new and unforeseen ways, with significant impacts on mobility and travel needs.

The Warren County Transportation Plan will include:

- Critical roadway, intersection, and bridge projects
- Rail and multimodal improvements to provide safe access for pedestrians, cyclists, and transit riders
- Strategies to support and enhance the local and regional economy

Goals

A successfully completed and implemented plan will:

- Improve safety for everyone
- Promote transportation investments and practices that meet the County's needs
- Enhance agricultural and heritage tourism and recreation
- Support improvements that enhance the economic vitality of the County while respecting its diverse rural and urban character

Get Involved

Do you live or work in Warren County or frequently visit? We want to hear from you! Tell us about your transportation-related experiences. Visit the study website to provide feedback:
