

MONMOUTH COUNTY:

Corlies Avenue Bridge

FUNDING RECOMMENDATION: \$500,230

LOCATION: Borough of Allenhurst and Township of Ocean, Monmouth County

MONMOUTH COUNTY successfully applied for a \$500,230 grant for this project through the NJTPA's Fiscal Year 2020 Local Capital Project Delivery Program. This project will investigate options for replacing or rehabilitating the Corlies Avenue Bridge over Deal Lake in the Borough of Allenhurst and Township of Ocean.

PROJECT DETAILS: This study will identify and compare options for the bridge. The concrete bridge deck is deteriorating and the bridge's wooden supports are showing signs of age and weathering. The sidewalks are too narrow to meet current standards and the railings on the bridge are substandard.

ABOUT THE PROJECT AREA: The original 203 feet long timber bridge was built in 1941. In 1976, the bridge was

reconstructed, and the wooden bridge deck was replaced with concrete, though most of the bridge's original wooden structure was maintained. About 3,500 vehicles travel over the bridge daily. The bridge is a regional transportation link, providing motorists, pedestrians and bicyclists with access to the Allenhurst NJ TRANSIT station. It is also critical to the vitality of downtown Allenhurst. Motorists use the bridge to access nearby State Routes 35, 66 and 71.
