**Name:** East Anderson Street Bridge (02C0023A) over the Hackensack River

The East Anderson Street/Cedar Lane Bridge (020023A) crosses the Hackensack River in the City of Hackensack and Township of Teaneck, Bergen County. The existing bridge is in overall critical condition and is structurally deficient and functionally obsolete due to geometry. In 2012, due to structural deficiencies, a weight restriction was instituted, barring trucks, buses and other vehicles over 15 tons from crossing the span. The two outer lanes of the bridge were also closed at that time and still remain closed. This project will include the replacement of the bridge and roadway improvements along CR 60 between River Street, Hackensack and River Road, Teaneck.

**DATE SUBMITTED:** 9/28/2020
The Kingsland Avenue Bridge over the Passaic River is in poor overall condition and is structurally deficient and functionally obsolete. The superstructure is in poor condition due to the severe corrosion and/or section loss of below deck truss members, floor beams and stringers. The overall condition of the mechanical drive machinery for the bridge lift system is also in poor condition. This is a bridge replacement project.
